Collaborative Care Agreement

The dedicated professionals at Central Focus Psychological Group strive to ensure that meaningful, competent care is provided to all our clients. *You are important to us!*

To achieve this goal, we promise to communicate effectively, to listen to your concerns, and to honor your time and experience as we engage in this new relationship with you. To help us achieve these goals, we ask that you also communicate with us effectively, to listen to us respectfully, and to honor our time and experience. *We are important to each other!*

Should at any time you feel that our relationship with each other has been jeopardized or needs special attention, please let us know so that we can work to improve the situation. To support these types of conversations we hereby enter into an agreement with you that we will always maintain courteous and professional standards of conversation with you. In turn, we look forward to your agreement that you will engage with us courteously and professionally and allow us to communicate concerns about our relationship with you. *Let's work together!*

Should we find ourselves in a difficult situation in which either party feels as though we are not being treated courteously and professionally, and there seems to be no effective way forward, either party is welcome to terminate the relationship and agrees to follow all processes required by the State of Colorado, and other governing boards that regulate the practices offered at Central Focus Psychological Group, to ethically and legally end the relationship. Of course, we will endeavor to avoid situations such as this and feel confident that you will do the same. *Collaborative care is our goal!*

The below signatures indicate agreement of the terms set forth in this Collaborative Care Agreement:

Dr. Clinton C. Pickett, Owner/President

Client/Guardian of Client
